<p>English</p>  <p>Keyboard parameters</p> <p>Key life: 50 million Working Voltage: +5V±5% Current: 500mA Dimension: 437x128x36mm Weight: 850g±20g</p> <p>Technical Features</p> <p>1. 9 cool LED lighting effects 2. Full keyboard without conflict, fast response 3. All mechanical switches, professional e-sports players standard equipment. 4. Multimedia function key combination, work game balance 5. Free of EEPROM memory, adopt Flash memory chip 6. Quick WIN, avoid fighting game by accident and cut out the desktop</p>	<p>Functional specifications</p> <p>1. Support common game mode key backlight and custom recording backlit function. Standard version: FN + 1-5 keys to fixed game mode button light, also can be custom modified by the customer. 2. Support 9 cool LED lighting effects (including boot animation), three color picture (boot screen), bum steady pattern, colorful breath, game superior, Rainbow, Pass without trace, Mix light ripples, Colorful horse race, Touch and Go, AIRY CRAFTS , Colorful time. 3. Support all mode, FN + “/-/-” five speed regulation, support FN + “↑/↓” five brightness control. 4. Support 6 key/N key mode switches automatically, E-bank password entry is not affected. 5. Support WIN Lock function and LED lamp effect indication, lock the Windows and APP key at the same time, WIN Lock bum steady indication, unlock, WIN Lock light off. 6. Support the “FN + ESC” reset function, restoring the default light setting of game superior. 7. Support the FN + PS, close/open backlight function.</p> <p>Lighting effects model switchover sequence</p> <p>● Press “FN + INS” into “bum steady model”: Keyboard overall backlight bum steady, brightness will be subject to before adjusted memory parameters, seven colors adjustable. ● Press again, enter “Colorful breath”: Keyboard overall backlight simulate breathing rhythm, implement curve changes from light off to the highest brightness. Brightness, color and breathing rhythm speed, will be subject to before adjusted memory parameters, press “FN + DEL” combination key, can switch over 7 color lights circularly. ● Press again, enter “game superior”: “FN + 1-5” default setting five groups of common game button lights, press “FN + HM” enter the custom mode, to redefine the button lights by the user, can press the same button continuously to switch over seven color lights. ● Press again, enter “Rainbow”: Keyboard overall backlight brightness invariant, light color fluctuates in rainbow by color, brightness and speed, will be subject to before adjusted memory parameters.</p>	<p>Functional specifications</p> <p>1. Support common game mode key backlight and custom recording backlit function. Standard version: FN + 1-5 keys to fixed game mode button light, also can be custom modified by the customer. 2. Support 9 cool LED lighting effects (including boot animation), three color picture (boot screen), bum steady pattern, colorful breath, game superior, Rainbow, Pass without trace, Mix light ripples, Colorful horse race, Touch and Go, AIRY CRAFTS , Colorful time. 3. Support all mode, FN + “/-/-” five speed regulation, support FN + “↑/↓” five brightness control. 4. Support 6 key/N key mode switches automatically, E-bank password entry is not affected. 5. Support WIN Lock function and LED lamp effect indication, lock the Windows and APP key at the same time, WIN Lock bum steady indication, unlock, WIN Lock light off. 6. Support the “FN + ESC” reset function, restoring the default light setting of game superior. 7. Support the FN + PS, close/open backlight function.</p> <p>Lighting effects model switchover sequence</p> <p>● Press “FN + INS” into “bum steady model”: Keyboard overall backlight bum steady, brightness will be subject to before adjusted memory parameters, seven colors adjustable. ● Press again, enter “Colorful breath”: Keyboard overall backlight simulate breathing rhythm, implement curve changes from light off to the highest brightness.
